- And more!

Robotic-assisted surgery

At McLaren, the most compassionate surgeons perform the most complex surgeries utilizing a robot surgical system. Surgeons now have broader capabilities and can use the system to perform a wide spectrum of minimally-invasive surgical procedures including gall bladder removal and hernia repair.

Advantages for patients can include shorter hospital stays, less pain, less risk for infection, faster recovery, less scarring, and speedier return to daily activities.

YOUR PATIENTS COMFORT AND HEALTH IS OUR PRIORITY

Breast Care Clinic

Located at the MSU Health Care at McLaren Greater Lansing's Breast Imaging Center, the comprehensive breast care clinic is a detailed and thorough breast evaluation clinic. Our physicians, clinicians, and staff are attuned to women's needs and with their clinical expertise and understanding of your patient's health concerns they provide superior care.

Your patient can expect a clinical breast exam, review of any recent imaging studies (mammogram, breast ultrasound, MRI) and have recommendations explained thoroughly. Additional imaging, stereotactic core biopsy, ultrasound guided core biopsy, and cyst aspirations will be performed during clinic when possible. If your patient needs surgery, it can be scheduled through the clinic.
